

# Zerica YouTap

December 5, 2022

**Zerica**, the brand specialists in innovative design-led water coolers and dispensers, presents YouTap, a new range of mixers for the smart kitchen. **Zerica**'s latest creation is the first type of tap to be launched under its own brand and is specifically designed to be used with the You undersink model.

In addition to the traditional cold and hot water choices in most homes, YouTap dispenses filtered water that's ambient, cold and sparkling, keeping the inlets separate. Five ways for five different types of water in line with emerging market needs both in terms of performance and also aesthetics.

The YouTap range is made from stainless steel to guarantee durability over time, while the two input lines guarantee maximum hygiene levels are maintained.

The collection is available in two models — L-shaped or U-shaped — both with a brushed stainless-steel finish. The five ways are accessed via two different commands.
