Zerica presents Omnia

editorial staff 24 February 2022

44 0

Zerica presents the **compact water dispenser Omnia**. This product is entirely **Made in Italy**: it was originally developed for office use, but it's ideal also for domestic use and for the hotels. Besides, zero maintenance is required thanks to **Zerica's Silver Turbo Clean refrigeration system** that cleans as it dispenses. With this technology, a water vortex is generated on the internal walls whenever water is dispensed so preventing biofilm and residue formation and bacteria proliferation. **Bacteriostatic silver seals the stainless-steel cooling chamber** for even greater peace of mind. The product is 25cm wide and has an extra-height dispensing area that continuously dispenses **up to 3 jugs of chilled or sparkling water**. Omnia is quiet and made of galvanised stainless steel with an anti-scratch coating. In Italy the product is distributed by I&D.
