Zerica unveils Supra Max dispenser

Italian water dispenser manufacturer, Zerica, has introduced its latest "super-compact" water cooler.

Supra Max, which can dispense 80 litres of water continuously, is described as an ultra-high capacity and ultra-compact machine. The dispenser features Zerica's Direct Chill design with internal coils and optional contactless buttons. It also offers magnetic fans for almost silent operation and has a dispensing area for jugs and water bottles.

Targeted at the at-home and office markets, Supra Max helps to eliminate the need for plastic bottles and uses R600a refrigerant gas.

Technological advancements are allowing the water cooler and dispenser industry to enhance its sustainability efforts
