Illy to launch self-service coffee bars across UK

Premium Italian coffee brand Illy, in partnership with Beanology, has launched a bean-to-cup, self-service coffee concept for retail, foodservice, leisure, education and convenience locations.

The 'Illy On The Go' self-serve coffee bars combine Illy's rigorous standards of coffee-making with Beanology's tailored on-the-go solutions to deliver a top-quality drinking experience. Retailer and foodservice partners will be able to bring their customer base a trusted name in coffee at the push of a button.

Serving 100% arabica beans, with a smooth, velvety flavour, the machines tap into growing demand for both self-serve and premium options. The unit itself is constructed from 95% recycled products, with 30% made from waste coffee grounds.

Jura unveils new, fully-automatic machine for 'coffee purists'

The latest launch from Swiss manufacturer Jura, the C3 fully automatic coffee machine has been crafted for so-called 'coffee purists,' to enjoy the uncompromising flavour of unadulterated espresso and black coffee specialties at home.

A compact machine, the C3 is nevertheless equipped with a full-size brewing unit and Jura's Professional Aroma Grinder to enable the user to prepare black coffee specialties with rich flavour and complex aromas in every cup. The Jura's patented Pulse Extraction Process optimises extraction time, delivering barista-quality espresso with a dense, velvety-soft crema.

For added convenience, the C3 features a dual-cup function, which prepares the selected beverage in two cycles meaning users can make two coffees simultaneously.

Since 1931. Smart Dispenser.
